

Education

Leiden University , Cosmology • Thesis: "Playing dice with the universe: Bayesian statistical analyses of cosmological models and new observables".	Leiden Sept 2018 – Oct 2022
Leiden University , Physics (Cosmology specialization)	Leiden Sept 2016 – Aug 2018
University of Cantabria , Physics (Fundamental Physics track) • ERASMUS exchange period at Utrecht University (2013–2014). • Summer internship at Brown University (2015).	Santander Sept 2011 – Mar 2016

Experience

Leiden Observatory , Veni Research Fellow NWO Veni-funded scientist developing AI-boosted statistical inference cosmological methods to extract robust constraints on dark matter and dark energy.	Leiden Jan 2026 – present 9 months
Royal Observatory Edinburgh & Institute for Astrophysics , Senior Research Fellow Researcher in weak lensing cosmology analysing Euclid's first photometric and cosmic shear data.	Edinburgh Oct 2025 – Jan 2026 4 months
European Space Agency (ESA) , Research Fellow in Space Science Independent researcher supporting the scientific preparation and development of the ESA Euclid mission.	Noordwijk Oct 2022 – Oct 2025 3 years 1 month
Lorentz Institute & Leiden Observatory , De Sitter Fellow Independent PhD candidate working at the interface between theoretical and observational cosmology.	Leiden Sept 2018 – Oct 2022 4 years 2 months
DESY , Research Trainee Developed a software pipeline to model the flux of relic neutrinos from supernova remnants.	Zeuthen June 2016 – Aug 2016 3 months
Instituto de Física de Cantabria , Research Assistant Provided pipeline development support for scientists in the LHC CMS experiment and the ESA Planck mission.	Santander Oct 2015 – May 2016 8 months
